Code Review Checklist

Name of code:
Coder:
Reviewer:

General
1. Does the code work/does it perform its intended function?
2. Is all the code easily understood?
3. Is there any redundant or duplicate code (either in this file or another)?
4. Is the code as modular as possible?

Performance
1. Are there any obvious optimizations that will improve performance?
2. Can any of the code be replaced with a library or built in functions?

Documentation
1. Do comments exist? If so, do they describe the intent of the code?
2. Is there any incomplete code? If so, mark with a 'TODO' comment.
