Retrospective Meeting

2020-06-11 / 10:30 - 11:30 / Zoom

What Went Well
1. What went great?
    a. We have actual outputs from some steps
    b. Main is mostly populated
    c. Grid search issues resolved
    d. Main_Pseudocode was very helpful
2. Where specifically do you feel we made the biggest leap ahead?
    a. We have actual outputs from some steps
    b. Main is mostly populated
    c. Decided to use current end use labels and provide recommendations on how to improve the predictions in the future

What Didn't Go Well
1. When do you think we experienced the biggest challenge?
    a. When reviewing other people's code and there is an error, is it quicker to just ask for help
    b. Working within a bunch of different branches (ensuring you are always working on the most up to date version)
    c. Thinking you are done with some code and then it being the cause of an error
    d. The fear of the project being completely invalid so late in the project (sorted now)
2. Where did the biggest roadblocks come from?
    a. Comfort with code collaboration
3. Which problems came up the most often?
    a. Comfort with code collaboration

      b. Choosing a time efficient test method

      c. How to write efficient code

4. Why were issues not complete/why issues were removed from sprint?

      a. UDL-63 still in progress b/c we had a lack of clarity

      b. UDL-90 still in progress b/c other priorities

      c. UDL-92 still in progress b/c time

What was Learned

1. What struggles did you find the hardest to overcome?

      a. Comfort with code collaboration

      b. Choosing a time efficient test method

      c. Modifying code to include try-excepts after the fact takes time

2. What one thing would you change for next time?

      a. Ask for help sooner

      b. Don't worry too much about the end quality (I.e. done is more important than perfect)

3. How can we take what we learned and use it for the next sprint?

      a. If struggling with something don't suffer, just ask

      b. Don't worry too much about the end quality (I.e. done is more important than perfect)

What's Still a Puzzle

1. What's your biggest uncertainty about what's happening outside our team?

      a. Timing on the final week (when do things need to be done?) I.e. when do we need the final presentation/report done

      b. Haven't spoken to Mike in a while, unclear on if he is we happy with what we have been/are doing

2. Where do we need to dig deeper into our plans or roadmap?

      a. How much time do we have left to work on the project vs. how much time do we have to work on the presentation/report?

3. What key context are we missing to do our work well?

a. How much time do we have left to work on the project vs. how much time do we have to work on the presentation/report?
